GENERAL DATA

Truck Capacities Capacity at different load centres

Note:

The listed capacities are valid only for the standard upright in vertical position with standard fork carriage and standard forks, up to max. lifting height of 3300 mm. The centre of gravity of the load may be displaced by max. 100 mm against the longitudinal centre plane of the truck. Load centre is determined from top and front face of the forks. The values are based on a 1000 mm cube load configuration with the centre of gravity at the true centre of the cube. With upright tilted forward lower capacity values are valid. Attachments, longer forks, exceptional load dimensions and higher lifting heights can reduce the capacity.

Please talk to your CLARK dealer if you require further information.

PRODUCT DESCRIPTION

With the CLARK CGC-series, reliable, durable and high-performance trucks have been designed for space-critical applications with heavy loads. Low operation and maintenance costs as well as a well-designed workplace set these forklift trucks apart.

Driver Environment

- Functional and secure
- Large, low step with perforated plate
- Stable non-slip rubber floor covering in the footwell
- Handle on the front spar on the entry side
- Safe climbing up and down on both sides
- Tilting steering column with top bending point for excellent knee and legroom
- Hydraulic power steering
- Adjustable artificial leather seat (mechanical suspension) weight adjustable from 50 to 140 kg
- Engine cover mounted hydraulic control levers or as an optional armrest mini lever
- Automotive style pedal arrangement
- Low front cowl for maximum visibility
- Clear view through the overhead guard
- Foot-operated parking brake for easy handling

Engine, Transmission

The CLARK CGC with LPG power ensures maximum efficiency during operation. The engines used are low in consumption and at the same time offer good performance. The temperatures of the engine and transmission are permanently monitored, and they are switched off when the limit values are exceeded. The H200 transmission developed by CLARK enables comfortable and precise travel. The CGC40 has a 1-speed transmission as standard and the CGC50-70 has a 2-speed transmission (switchover via the dashboard).

LPG Engine

- PSI 4X V6 (4.3 L)
- Full EPA Tier 4 certification (EU exhaust level 5)
- Clean, economical and powerful engine with three-way catalyst
- ECU-controlled map ignition for more torque
- 6-cylinder design with overhead camshafts
- Electronic speed measurement

Steering system

- Hydrostatic power steering
- Travel surface impacts are intercepted
- The floating steering axle is mounted in rubber-steel elements

Brake system

- Low maintenance disc brakes
- Brake boost for less effort during braking
- Easy access for maintenance filtered and cooled
- Hydraulic oil is constantly filtered and cooled

Hydraulic system

- Oil cleanliness through hydraulic oil filtration on each return to the tank
- Large hydraulic oil tank allows the use of multiple attachments
- High level of safety with safety valve to prevent uncontrolled lowering of loads

Upright

- Uprights available in standard or triplex versions
- Maximum visibility through particularly wide uprights, narrow centre cylinders and optimum upright rollers
- Angled upright rollers
- Tilt cylinders mounted in spherical bearings
- Integral tilt-lock valve prevents the upright from tilting forward too fast or unintentionally
- Sturdy 6-roller fork carriage with FEM fork carriage

Additional standard equipment

Work lights, cushion tyres, combination rear lights with brake lights and white reversing lights, paintwork in the bright safety colour „CLARK HOT YELLOW GREEN“. Driver's compartment, upright and rims in black

Additional equipment

- Additional hydraulic functions
- Kick-on sideshifter
- Strobe light
- Rear work lights
- LED headlights
- Armrest
- Orange seat belt with safety feature
- Side with hiprest for easy entry
- Full suspension driver's seats (vinyl or fabric)
- Rear handle with horn
- Safety switch for attachments with clamp function
- Swing-down LPG tank bracket
- Storage panel and drinks holder
- Rearview mirror
- Quick release coupling
- Non-marking tyres
- Pre-cleaner on overhead guard
- 2-gear transmission for CGC40
- Painted in various RAL colours to customer's requirements

Safety

The CGC-Series is CE certified and complies with all European safety standards for industrial trucks.

Contact your CLARK dealer to find your optimum forklift.
