T in accordance with DIN EN 12053 (previously DIN 45635-36) *5 Values for Wide Drive Tyre (Option) *6 LPG= Stage 4 *7 Max. 140 bar

All values shown are for standard lift truck with standard equipment. If the truck is supplied with options, values may change.

All values given may vary + 5 % and - 10 % due the motor and system tolerances and represent nominal values obtained under typical operating conditions.

PRODUCT DESCRIPTION

The S-Series from CLARK marks a further development in reliable, durable and powerful forklifts. Lower operating and maintenance costs combined with a well-designed and ergonomic operator compartment are what makes this forklift truly unique.

Driver Environment

- Functional, safe with minimal vibrations
- Low positioned perforated non-slip metal step
- Fully covered anti-slip rubber foot area
- A grab handle on the driver side of entry makes it easy to climb up and down
- Adjustable steering column allows more leg and foot room
- Small steering wheel diameter ($\varnothing=300$ mm)
- Hydraulic power steering
- Adjustable artificial leather vinyl seat with mechanical suspension weight adjustable from 50 to 140 kg
- Engine cover mounted hydraulic control levers or as an optional armrest mini lever
- Automotive style foot pedals
- Low front cowl for improved visibility
- Excellent visibility from a new developed driver's roof
- Cup holder, storage box and document holder including a 12V power connection

Smart-Display

- Clear and easy-to-read 5-inch colour display
- Protected against water ingress
- Maintenance indicator and password-protected service access
- Selection of different warning signs (optical / acoustic)

Fuel efficiency truck management options

- Automatic engine shut down timer for excessive engine idling
- Automatic light switch-off
 - The setting for each shutdown function can be activated on demand and will be set after operator has left the driver seat
 - The shutdown timer delay is adjustable

Engine, Transmission

The CLARK S-Series forklifts with LPG power offer excellent acceleration and performance power. These modern engines are efficient and at the top end of the performance class. Temperature from the engine and transmission is constantly monitored and in the event of design limits being exceeded the engine is automatically shut-down. Rubber mounted transmission and drive axle, separated by a heavy duty flexible coupling, reduces vibrations and noise to a minimum.

LPG Engine

- FORD (2.5L)
- ECU-controlled map ignition for more torque
- 4-cylinder design with overhead camshafts
- Electronic controlled engine speed

Steering system

- Hydrostatic power steering eliminating steering kick-back
- A robust steering axle with pivotal bearings in mounted rubber steel moulded mounting

Brake system

- Maintenance free wet disc service brakes
- Power assisted service brake for easier brake operation with more effect
- Automatic parking brake

Hydraulic system

- Full-flow reverse filter, filters the oil to the tank at each reverse flow
- Rough particles are filtered directly via a suction filter, thereby preventing them from entering the oil circuit, ensuring a long service life for all hydraulic components
- Large hydraulic oil tank makes sure that there is always enough hydraulic oil available for the highest upright and all attachments
- A safety valve provides extra safety and prevents an uncontrolled load lowering at all times

Upright

- The clear-view uprights are available in Standard, Hilo, Triplex and Quad versions
- Perfect view through extra-wide masts, narrow centre cylinders and optimum mast design
- Adjustable sealed canted (Angled) rollers minimize deflection
- Spherical mounted tilt cylinders bearings
- An integral tilt-lock valve prevents mast tilt drift
- Robust 6-roller fork carriage with adjustable side thrust rollers for durability
- A CLARK hydraulic dampening system reduces impacts and vibrations during the transition between the individual lifting sections in raising and lowering, thus protecting the products and extending service life

Additional standard equipment

LED-front headlights, pneumatic tyres, LED-direction indicator lights, combination rear lights with brake lights and white reversing lights. Paintwork in a bright safety colour „CLARK HOT YELLOW GREEN“. Driver's compartment and upright in matt black, rims in gloss black

Additional equipment

- SE tyres
- Various attachments
- Armrest mounted mini-lever with direction control
- Smart travel direction switch mounted on the mechanical hydraulic lever
- Integrated or hook-type side-shifter
- Speed limiter (adjustable from 6 km/h to max. travel speed)
- Rear view camera
- USB charging port in storage box
- Safety light as visual back-up alarm
- Load weight measurement (tolerance: 1% of the rated load)
- CLARK vertical mast system (automatic vertical upright position tilt lock)
- Attachment quick-release couplings
- Various seats with armrest or side wings
- Acoustic reverse alarm
- Reduced overhead guard heights
- Vertical exhaust tail pipe
- ...and much more

Safety

The S-Series is CE certified and conforms to all European safety standards for industrial trucks.

Contact your CLARK dealer to find your optimum forklift.

GENERAL DATA

Truck Capacities Capacity at different load centres

Note:

The listed capacities are valid only for the standard upright in vertical position with standard fork carriage and standard forks, up to max. lifting height of 3300 mm. The centre of gravity of the load may be displaced by max. 100 mm against the longitudinal centre plane of the truck. Load centre is determined from top and front face of the forks. The values are based on a 1000 mm cube load configuration with the centre of gravity at the true centre of the cube. With upright tilted forward lower capacity values are valid. Attachments, longer forks, exceptional load dimensions and higher lifting heights can reduce the capacity.

Please talk to your CLARK dealer if you require further information.
