**LITHIUM-ION  
LOW LIFT PALLET TRUCK**  
CAPACITY 2,000 KG

**THE FORKLIFT**

The compact power package

High-performance 48 volt drive with lithium-ion power

Length including face of forks (l2) only 423 mm

**L-ion**  
CLARK Lithium-Ion-Power

**LITHIUM-ION  
LOW LIFT PALLET TRUCK  
CAPACITY 2,000 KG**

**FOR OPTIMUM USE IN INDUSTRIAL, LOGISTIC AND RETAIL APPLICATIONS**

**ERGONOMIC CONTROLS WITH SMART DISPLAY**

**SIMPLE AND RAPID BATTERY CHANGE**

## THE WPio20 - A COMPACT POWER PACKAGE

The WPio20 lithium-ion hand pallet truck is ideal for transporting goods of all types over short distances. With L2 dimension (length to face of forks) of only 423 mm, the WPio20 is extremely compact and therefore highly suited for use in very confined spaces e.g. in cramped storage zones or sales areas. Battery charging is possible on any 230 volt socket. A large multifunction display in the control arm informs the operator about battery charge level and operating hours, as well as battery management.

### SHORT CHARGING TIMES + TOP-UP CHARGING CAPACITY

As a result of top-up charging, long downtimes for full charging can be avoided. The Li-ion battery, with a weight of only 14 kg, can be changed very easily and ensures the highest level of availability. A small lamp in the lithium-ion battery further enables the illumination of dark storage areas.

 <b>Capacity:</b> max. 2,000 kg	 <b>Height of lift:</b> max. 140 mm	 <b>Driving speed:</b> max. 5.5 km/h	 <b>Work processing width:</b> min. 2,050 mm	 <b>Battery power:</b> max. 48 V 30 Ah	 <b>Drive motor performance:</b> 48 V, 0.75 kW
